

## **Members Present**

Professor Gabauer, Professor Thompson, Dr. Midkiff, Griffin Dunn, Colin Madigan, Phil Stahlfeld

## **8:00 to 8:05 Review of Panel**

Give overview of Panel 1 for benefit of Midkiff who was not present

## **8:05 to 8:15 Interface Discussion**

Discussion of interface. Clients are fine with removing interface from project specifications.

## **8:15 to 8:25**

Discussion of capture device options. Gathered additional goals (not tech specs): capture black boards, multiple boards, provide interface for browsing and editing, correct for color changes in boards, correct for placing capture device off center from board.

## **8:25 to 8:40 Discussion with Thompson**

Organize background document. Think about why information should be grouped. Explain why MS WCS is so important to the project. Research signal processing (libraries, frameworks, general concepts). Why is the system applicable to learning disabilities (what students need and why).
